PROFESSIONAL SUMMARY

IT consultant with 3+ years of experience across backend, frontend, and cloud/DevOps work. Primary focus on backend development in C#, with additional experience in React and SQL Server, and hands-on work with Azure infrastructure, Azure integrations, and CI/CD pipelines in YAML. Holds an M.Sc. in Computer Science from Karlstad University, with a thesis on Kubernetes and container orchestration. Comfortable working across the full stack and leading projects end-to-end, from infrastructure to customer contact. Team player who thrives in collaborative, agile environments.

EXPERIENCE

Dekiru Solutions AB

July 2023 – Present

IT Consultant

Stockholm

- Worked across a wide range of client projects and environments over three years, building a broad, practical understanding of modern software development
- Worked on **system integration** for a large enterprise client, using **Azure and BizTalk**
- Contributed to a high-complexity application handling **large volumes of data** for another large client, primarily in **backend development** with additional frontend work
- **Built the full backend** of a booking system, contributed to the frontend, and independently handled all **DevOps and cloud infrastructure**
- **Built and led** a Bitcoin calculator/simulator project end-to-end: full backend, frontend contributions, infrastructure, and CI/CD setup, while acting as **project lead with direct customer contact**

PROJECTS

Terminal Portfolio Site

- Designed and built a personal portfolio site styled as an interactive terminal

iOS App – KortLeken

- An interactive party card game app for iOS with sound effects and custom visuals
- Stack: Swift, SwiftUI

iOS and android App – Ryan Raccoon

- An endless 2D side-scrolling runner where you play as Ryan the raccoon dodging obstacles as far as you can go.
- Stack: Unity 2021, C#

EDUCATION

Karlstad University

Aug 2018 – June 2023

Master of Science in Computer Science

Karlstad

- **Thesis:** Optimizing Kubernetes for Scalability and Resilience in Containerized Environments
